Election/Restrictions

7. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 2872

Group I, claim(s) 15-17, drawn to a correcting device, including specifics of the material of the correcting elements.

Group II, claim(s) 18, drawn to a correcting device, including specifics of the curvature of the surfaces of the correcting elements.

Group III, claim(s) 19, drawn to a correcting device, including specifics of the birefringence axes of the correcting elements.

Group IV, claim(s) 20, drawn to a correcting device, including specifics of the reduction of wavefront errors due to thickness variations.

Group V, claim(s) 21, drawn to a correcting device, including specifics of a second correcting member.

Group VI, claim(s) 22-26, drawn to a correcting device, including specifics of a projection objective and microlithographic exposure apparatus.

Claim 14 links Groups I, II, III, IV, V, and VI. The features of Claim 14, which are shown either singly or in combination in US 6252712 and US 3663087, both of record, lack novelty or an inventive step and do not contribute over the prior art.

8. The inventions listed as Groups I, II, III, IV, V, and VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

For each of Groups I, II, III, IV, V, and VI, each of the listed groups has special technical features not required for the other groups. The special technical features exclusive to each group are listed above in the listing of the groups.

9. A telephone call was made to George F. Lehnigk (202-293-7060) on 3/21/09 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
